SUN AND GLASS

Construct and use sun and glass using the following steps:

1. Locate a sunny spot in an open area.
2. Gather tinder and kindling in a small pile.
3. Point a piece of glass or convex lens to concentrate the rays of sun on the tinder.
4. When the tinder begins to smolder, fan or blow it gently into a flame.
5. Stop and lightly blow on the tinder to start combustion, once the tinder begins to smoke.
6. Apply gathered kindling and fuel as required, when the tinder ignites.
